

In April of this year our parent company, DC Chemical, changed their corporate name to OCI Company LTD. They did this in honor of their fifteenth anniversary and desire to foster a new image that represents its fundamental values and goals. The company's new name "OCI" means the "Origin of Chemical Innovation" and encompasses its core values of Future, Innovation and Leadership. Along with this they launched a new corporate identity while visualizing "Window to the Future."

In an effort to build up OCI's corporate identity in the global market, OCI Chemical will be adopting this same logo. We will transition to the new logo over the next 6 – 9 months so as to minimize the cost impact to the business.

Making this change will provide consistency for the OCI name around the world and represent a step forward in accomplishing our goal to become one of the leading chemical companies in the world.
