### **Kevin Boyle named President & CEO of OCI Chemical Corporation effective June 1.**

**Shelton, CT – April 25, 2007** — OCI Chemical, a leading worldwide provider of natural soda ash and sodium percarbonate, announced today that Kevin Boyle has been named President & CEO of OCI Chemical Corporation. He will join the company on June 1, 2007, and will assume the following representative positions:

- Director and President of OCI Enterprises Inc.;
- Director and President & CEO of OCI Chemical Corporation;
- Partnership Committee Member and President & CEO of OCI Wyoming, L.P., and
- Board Member of ANSAC

Kevin joins OCI with over twenty years' experience in the chemical industry. He began his career with the French-based TOTAL Petrochemicals in 1986 as an Engineer at their Cos-Mar Plant in Louisiana, USA. Kevin held positions of increasing responsibility within several functional areas, including manufacturing, quality, supply chain, and sales. In 1998 he was named Vice President of the Polyethylene Chemicals Division, and in 2003 he was named the Vice President of Base Chemicals and Supply Chain, both in Texas, USA. Most recently, Kevin held the position of President of Styrenics in Brussels, Belgium, since 2004.

“We are very excited to have Kevin assume his leadership role at OCI,” explains Greg Baik, President & CEO of DC Chemical. “His experience and proven skills to successfully lead a major division of a global organization will further enhance our efforts and vision to become a leading global chemical company.”

Kevin earned a Bachelor of Science degree in Chemical Engineering from Louisiana State University.

#### **About OCI Chemical Corp.**

Headquartered in Shelton, Connecticut, OCI Chemical Corporation is a wholly owned North American subsidiary of DC Chemicals Ltd. of South Korea. OCI Chemical Corporation was founded in 1996, as part of DC Chemical's acquisition of Rhone Poulenc's U.S. soda ash

interests. Our Green River operation, however, dates back to 1962, when the facility was established by Stauffer Chemical.
